## **FOR IMMEDIATE RELEASE: FIDELITY ALARM IN PHILADELPHIA MAKES THE SWITCH TO SOLAR ENERGY**

**January 12, 2015 (Southampton, PA)** - Moore Energy, a Bucks County based solar power system installer, has completed installation of a 78 kilowatt system on the rooftop of Fidelity Alarm in NE Philadelphia. The solar array will offset virtually all of the customer's electricity bill.

"This is the second time I have worked with Moore Energy. After installing a solar power system on my home in 2010, I was anxious to bring the savings benefits to my business," said Paul Hillier, owner of Fidelity Alarm. Fidelity Alarm's system was designed using tenK Solar, a PV kit solution with a low voltage design that optimizes the commercial rooftop space while delivering the highest reliability and safety standards. The tenK Solar system utilizes reflected light energy through reflectors that capture available light and reflect it back on the modules. In addition to increasing the yield of the system by up to 20%, the reflector has the added benefit of improving system aerodynamics. This is the first tenK Solar system installed in Philadelphia.

Barry Moore, President at Moore Energy, commented, "We are excited to have completed a very successful year with this solar system at Fidelity Alarm. The tenK Solar system was a great fit for the unique project. We are working with the customer now to plan an expansion project in 2015."

### **About Moore Energy:**

Moore Energy is a premier firm specializing in solar photovoltaic power systems for commercial and residential properties. We are the single source for our customers providing the design, cost/benefit analysis, installation, and system maintenance. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers. For more information, visit [www.MooreEnergy.com](http://www.MooreEnergy.com).

Moore Energy is a certified installer in Pennsylvania, New Jersey, Connecticut, Maryland and New York. Attractive federal and state rebates are still available for home and business owners interested in going solar.
