FOR IMMEDIATE RELEASE:

MOORE ENERGY CUSTOMERS AVOID HIGH ENERGY RATES THROUGHOUT COLD WINTER MONTHS

April 17, 2014 (Southampton, PA) - Now is a great time for home and business owners to consider a solar energy system to help lower monthly electric costs. Newtown resident and Moore Energy customer Dr. James Weber was happy to have his solar system over this past winter. "This has been one of the coldest winters in recent memory. It was a great feeling to open our PECO electric bill for the February to March billing period and see that it was only \$7," said Dr. Weber.

Attractive Federal and State financial incentives are available to Pennsylvania home and business owners. "Within the first year of owning a solar system, system owners will see between 35-45% of their investment returned," says Barry Moore, President at Moore Energy. Moore Energy has installed several 100 solar systems throughout Pennsylvania and is certified to install systems in Pennsylvania, New Jersey, Maryland and Connecticut.

About Moore Energy:

Moore Energy is a premier firm specializing in solar photovoltaic power systems for commercial and residential properties. We are the single source for our customers providing the design, cost/benefit analysis, installation, and system maintenance. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers.
