**FOR IMMEDIATE RELEASE: MOORE ENERGY HAS JUST BEEN APPROVED BY NYSERDA TO INSTALL SOLAR SYSTEMS OVER 200 kW**

**Southampton, Pennsylvania (9/3/2015)** – Moore Energy has just announced that it received approval from NYSERDA, New York State Energy Research and Development Authority, to install solar energy systems under the NYSERDA Residential/Small Commercial PV Program (<200 kW) and the Commercial/Industrial PV Program (> 200kW). This news comes in as the company is expanding services to surrounding states and has won over a megawatt of projects in recent months. “We couldn’t be happier with the news. Moore Energy has been providing exceptional service and quality to our customers in Pennsylvania for several years, this will allow us to share that same quality and enthusiasm with the residential and commercial customers in NY who are looking for an established and respected company to perform their installation”, said Barry Moore, President of Moore Energy.

About Moore Energy:

Moore Energy is a premier firm specializing in solar photovoltaic power systems for residential, farms, commercial, public schools, military bases, and municipal governments. We are the single source for our customers providing the design, cost/benefit analysis, installation, and system maintenance. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers. For more information, visit [www.MooreEnergy.com](http://www.MooreEnergy.com).

Moore Energy is a certified installer in Pennsylvania, New Jersey, Connecticut, Maryland and New York. Attractive federal and state incentives are still available for home and business owners interested in going solar.
