**FOR IMMEDIATE RELEASE:**

**A FUTURE OF SUNSHINE SAVINGS FOR SOLAR INSTALLER MOORE ENERGY**

**October 15, 2013 (Southampton, PA)** - Southampton based solar energy company Moore Energy recently completed installation of a 23.4 kilowatt solar system on the rooftop of their corporate headquarters. The flat roof system, installed with a ballasted solar mounting system, will provide more than 70 percent of the power used in their 22,000 sq. ft. warehouse and office space. The payback for the system will be less than four years.

Barry Moore, President at Moore Energy, commented, "Solar is a great investment for several reasons. Not only will we recognize significant financial benefits, but our goal is to have a positive impact on the environment. Most business owners are pleasantly surprised with the efficiency of solar systems and the significant cost savings. Solar powered buildings also have a positive impact on employee moral as most people are becoming increasingly concerned about the environment."

Moore Energy is a certified installer in Pennsylvania, New Jersey, Connecticut, Maryland and New York. Attractive federal and state rebates are still available to home and business owners interested in going solar.

**About Moore Energy:**

Moore Energy is a premier firm specializing in solar photovoltaic power systems for commercial and residential properties. We are the single source for our customers providing the design, cost/benefit analysis, installation, and system maintenance. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers.
