FOR IMMEDIATE RELEASE: MOORE ENERGY SEES STRONG FIRST QUARTER SOLAR SALES

April 6, 2015 (Southampton, PA) - Moore Energy, a Bucks County based solar system installer, has completed the first quarter of 2015 with increased sales and is on target to finish 2015 with a record year in solar sales.

Barry Moore, President at Moore Energy, commented, "Both PECO and PPL have recently proposed electric rate increases for customers throughout Pennsylvania. The total electric rate increase for residential electricity customers is projected to be 4.4 to 6.9 percent. It is a great time to consider making the switch to solar while attractive financial incentives are still available and before these utility rate increases go into effect."

The proposed PPL increase would raise an additional \$167.5 million a year which would fund ongoing reliability improvements. The proposed PECO rate increase would fund a portion of \$300 million needed for ongoing system work, including replacing equipment and upgrading infrastructure.

About Moore Energy:

Moore Energy is a premier firm specializing in solar photovoltaic power systems for residential, farms, commercial, public schools, military bases, and municipal governments. We are the single source for our customers providing the design, cost/benefit analysis, installation, and system maintenance. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers. For more information, visit www.MooreEnergy.com.

Moore Energy is a certified installer in Pennsylvania, New Jersey, Connecticut, Maryland and New York. Attractive federal and state rebates are still available for home and business owners interested in going solar.
