FOR IMMEDIATE RELEASE: QUAKERTOWN HIGH SCHOOL TO INSTALL 500 KWatt SOLAR SYSTEM

May 27, 2015 (Southampton, PA) - Moore Energy, a Bucks County based solar photovoltaic system installer, has signed a Power Purchase Agreement with Quakertown Community School District to install a solar array at Quakertown High School in Quakertown Borough. The solar system will be installed in two phases, 350 kWatts this summer and 150 kWatts next summer. The solar system will be installed at no cost to the District and is projected to save the school district over \$1.5 million during its twenty year term.

The solar system was designed using tenK Solar, a ARRA compliant solution with a low voltage design that optimizes the High School's rooftop space while delivering the highest reliability and safety standards. The tenK Solar system utilizes reflected light energy through reflectors that capture available light and reflect it back on the modules. In addition to increasing the yield of the system by up to 20%, the reflector has the added benefit of improving system aerodynamics.

Barry Moore, President at Moore Energy, commented, "We are pleased that the Quakertown School Board recognizes the importance of renewable energy and is taking action to promote solar as part of the major renovations being made at the High School". Paul Stepanoff, President of the Quakertown School Board added, " The Power Purchase proposal from Moore Energy was the most cost effective for the District as it comes at no cost to the School District and will save a significant amount of money."

About Moore Energy:

Moore Energy is a premier renewable energy firm specializing in solar photovoltaic power systems for commercial, residential, public schools, military bases and municipal properties. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers. For more information, visit www.MooreEnergy.com.

Moore Energy is a certified installer in Pennsylvania, New Jersey, New York, Connecticut, Maryland and Virginia. Attractive federal and state rebates are still available for home and business owners interested in going solar.
