Moore Energy Recognized as a Top Solar Contractor in United States

The Solar Power World Top Solar Contractors list includes Pennsylvania-based Moore Energy—Coming off the biggest year ever for U.S. solar installations, local installer Moore Energy is proud to be named one of the top solar contractors in the United States by Solar Power World magazine. Moore Energy achieved a rank of 200 out of 500 solar companies, an improvement from 382nd last year. The Top Solar Contractors list is developed by Solar Power World to recognize the work completed by solar contractors across the United States. Produced annually, the Top Solar Contractors list celebrates the achievements of U.S. solar developers, subcontractors and installers within the utility, commercial and residential markets.

“The 2018 Top Solar Contractors list features 500 of the best solar contractors in the United States,” said Kelly Pickerel, managing editor of Solar Power World. Solar Power World chooses the top 500 of the best solar contractors based on criteria including the primary market, kilowatts installed in the previous year, and markets served. Moore Energy strives to make a positive impact in our communities and serve the ever-changing residential and industrial markets. Moore Energy works closely with clients and earned this spot on the list not only because of kilowatts installed, but by helping and fostering relationships with people throughout the United States.

The solar industry is growing at record pace in the United States and in the last decade solar has experienced an average annual growth rate of over 60%. This growth in solar is due to the cost to install solar has dropped by more than 70% since 2010. The growth in solar is unprecedented as there are more than 1.7 million solar installations in the U.S, which will grow to around 4 million installations by 2023.

Moore Energy installed over 3 MW of solar in 2017. Since its founding in 2008, the company has installed over 20 MW of solar. Moore Energy is a premier renewable energy firm that specializes in solar and energy storage systems for commercial, residential, school and governmental properties as well as providing maintenance and reconstruction on systems installed by other companies. All work is professionally completed by its own full-time employees. Moore Energy owns PV Racking, a manufacturer of solar racking for ground mounted and pitch roof solar systems which is marketed nationwide. In 2018, Moore Energy began to also offer energy storage systems through the Fortress Power product line using advanced lithium battery technology to protect clients from power outages.

“We are honored to be named to the Top 500 Solar Contractors List. This is our 5th year in a row on the list and we are very proud of the work our teams have done to enable us to be a part of this list.’, said Barry Moore, President of Moore Energy. “Our company continues to focus on providing the highest level of service and quality products to our customers.”
